On the road cash price	£ 73,985.00

CO2 Emissions: 194 g/km

^[1] The fuel consumption given in miles per gallon, energy consumption is in kWh/62 miles and the CO# emission given in grams per kilometre were determined in a standardised test cycle. They represent the combined values for the basic model with the transmission offered in the basic version. The range shown displays the fuel consumption and CO# values from the smallest to largest wheel size available on the selected engine of the selected model. These figures are intended for comparison purposes and may not be representative of what a user achieves under usual driving conditions. For plug-in hybrid and battery electric vehicles these figures are obtained after the battery had been fully charged, in case of plug-in hybrid vehicles they are obtained using a combination of battery power and petrol fuel. Plug-in hybrid and battery electric vehicles require mains electricity for charging. *The recommended on the road cash price includes delivery, BMW Emergency Service, number plates, first registration fee and vehicle excise duty.
