

## Original BMW Accessories

### Sport brake retrofit kit

#### X5 (F15)

#### X6 (F16)

#### NEWS:

- Product information revised

#### Product description

The retrofit kit is the first BMW M Performance sport brake available for the X5/X6. The blue-painted brake callipers, which features a coloured, printed-on BMW M logo at the front, look especially stylish thanks to the open rim design.

#### Sales features/benefits

- The larger, **internally-ventilated 19" BMW M Performance lightweight brake disks** ensure **improved thermal capacity** and therefore for greater braking performance under extreme conditions.
- During frequent changes of fast acceleration and braking, the **braking performance** (good responsiveness and thermal resilience) is **maintained for longer**.
- The **attractive appearance** of the **brakes painted in M Performance blue** highlights their sportiness, especially when used in conjunction with alloy wheels with an open wheel design.
- The brakes' **low weight** means low unsprung masses.
- The Sport brake is an Original BMW product that has been tested during development and which therefore satisfies all of BMW's standards in terms of performance and quality.

#### Competition comparison

The M Performance Sport brake offers the best price/performance ratio in a comparison of competitors.

#### Functionality

4-piston aluminium brake calliper on the front axle (including printed colour BMW M logo) and aluminium combination sliding calliper on the rear axle painted in blue.

#### Promotion

The installation of the BMW M Performance Sport brake in a showroom car enables the product to be displayed effectively at the POS (Point of Sales).

Sport brake retrofit kit

#### Technical information

- Homologation: The BMW M Performance sport brake system for F15/F16 models is included in EC Homologation No. 13-00494-CP-GBM-00. National approval and modification of the vehicle documents is always necessary, since the brake system changes in the data relevant to the permit.
- The DSC coding must be adapted to the BMW M Performance Sport brake system.
