Product description

The 18" BMW M3 Competition sports brake corresponds to the series production brake of the E46 M3 CSL.

- Floating calliper with 60 mm plunger diameter on the front axle.
- Perforated, internally ventilated brake discs on the front axle in the size 345x28 mm.
- Floating calliper with 46 mm plunger diameter on the rear axle.
- Perforated, internally ventilated brake discs on the rear axle in the size 328x20 mm.
- Not available ex-works.

Sales arguments / advantages

- The 18" BMW M3 Competition sports brake improves the thermal load capacity thanks to larger, internally ventilated perforated brake discs on front and rear axles.

Note

- They must be installed as described in the special BMW installation instructions.
- The car must be run-in carefully during the first 200 km after installation of the sports brake! Only then is the full effectiveness of the sports brake assured.
- As a result of the special construction of the perforated brake discs, they may generate noise when the brakes are used, but this has no effect on the stability of the brake discs.

Homologation

- As a general rule: The 18" BMW M3 Competition sports brake can only be registered for cars from 09/02.
- The brake from EC homologation number e1*2001/116*0150*06 is included for the E46 M3 Coupé.
- For the E46 M3 Convertible, a new homologation must be obtained on the basis of TÜV parts report (No. 351-0119-05-FBTP).
- National approval and amendment of the vehicle registration documents are always required since the brake system changes in the data relevant for registration! ◀

Safety note

- The DSC coding must be adapted to the 18" BMW M3 Competition sports brake. This is only possible on cars from 09/02.
- The 18" BMW M3 Competition sports brake is only approved in conjunction with at least 18" aluminium wheels (even in winter)!
- As a general rule: Please consult the EPC for the latest information on permitted wheels! ◀
