#### Product description

- The 16-inch John Cooper Works sport brake disc can be installed in the MINI R55/R56 Cooper S with a standard brake system without requiring any additional modifications to the front axle
- The 16-inch John Cooper Works sport brake disc is included in the retrofit kit (34 11 0 428 914) for the MINI R55/R56 16-inch John Cooper Works sport brake – available for all R55/R56 models.
- In the MINI R50/R52/R53, the brake disc can be installed in conjunction with the John Cooper Works sport brake and the Galfer 5014 brake pad (34 11 6 778 320)
- Perforated and grooved, internally ventilated sport brake disc for the front axle
- The holes and grooves in the John Cooper Works sport brake disc reduce formation of a film of water between the brake pad and the brake disc
- The John Cooper Works sport brake disc was designed and developed as a special accessory in cooperation with BMW Group brake specialists
- Not available ex-works.

#### Sales features/benefits

- Improved look
- Underlines the sporty character, particular when combined with alloy wheels with an open wheel design
- As a result of the special construction features of the perforated and grooved brake discs, they may generate noise when the brakes are used, but this has no effect on the stability of the brake discs
- Brake discs are subject to wear: The perforated brake discs can be offered to the customer as an alternative when changing discs on the R55/R56 Cooper S

#### Homologation

- No entry is required in the vehicle registration document for the MINI R55/R56 Cooper S or already retrofitted R55/R56 or R50/R52/R53 16-inch John Cooper Works since the brake system's data that are relevant for registration do not change.

John Cooper Works 16-inch sport brake disc, perforated, grooved and 16-inch sport brake, R55/R56 Cooper S

#### Safety note

The John Cooper Works sport brake disc is, like the 16-inch standard brake disc, only permitted with alloy wheels of at least 16-inch size (also in winter). ◀ **Please ensure that you pass this information on to the customer.**
